Also drain tile.

February 15, 1934

Dear Friend:-

The enclosed price sheet lists our offerings for this season. Our spring circular with descriptions of our seeds and farm chemicals, and recommendations for their use, will be mailed to you shortly.

Supplies of good seed oats and barley are very short this year and with a strong demand for these grains indicated, it will be well to get your order in early.

The same is true with regard to seed potatoes - especially early varieties. The recent cold wave with its 20 to 40° below zero temperatures doubtless resulted in considerable loss thru frost injury to stock in cars, storages, stores and growers' cellars, reducing to a still lower figure the already inadequate supply. Higher prices are expected.

You will note that we have wilt resistant hybrid sweet corns. We are preparing a special circular on sweet corn, with information about the wilt disease gathered from reports from experiment stations, county agents, canners and growers of sweet corn all over the country. This should be ready for mailing some time next week. We will be glad to send you a copy if you wish.

Hoping that we may have an opportunity to serve you, I am

Sincerely,

KCL*R
